Appendix D GVC Transaction codes

The GVC Transaction Codification list contains the current list of possible GVC Geschäftsvorfallcodes in the Camt files.

Below deviations from Appendix 3 of DFÜ Agreement from Deutsche Kreditwirtschaft need to be taken in consideration for GVC codification.

- ING delivers ISO Bank Transactions Code and Business Transaction Code (GVC) on C level and when applicable (global enrichments) on D-level. Swift Transaction Code, Priman Nota number and Text Key Supplement are not provided.
- ING continues to provide codes removed from the above mentioned documentation but existing in previous version. Some products are obsolete/not used anymore in Germany but still offered in other countries where ING branches are located (i.e domestic direct debit, domestic batch...).
