Unlocking Value With Green Finance

Municipal issuers have been key drivers of growth in the US green bond market to date, raising $18.6bn.

But US corporates are beginning to recognize the value on offer too.

New research from ING finds that corporate appetite for green finance is growing, that it can deliver value for the organizations that embrace it, and that finance professionals must begin to actively identify opportunities to access it.

Appetite for green finance is rising

US domiciled issuers have now raised more than $50bn of green bonds and green loans among US corporates...

And our research identifies a rising demand for green bonds and green loans among US corporates...

For corporates and investors, the arguments for green finance are growing stronger:

Finance and treasury professionals need to engage with sustainability teams and enhance their knowledge to help the business unlock value through green finance...

Global green bond issuance hit a record level of $155.5bn in 2017, with the US, China and France accounting for 56% of issuance.

In the US, however, government-sponsored mortgage financer Fannie Mae accounted for a significant proportion of the issuance, at $24.9bn, with corporates making up a relatively smaller slice of the pie.

Looking ahead, as US corporates become more adept at integrating sustainability into business strategy and engaging the finance function, they can increasingly access the innovative green finance market, and unlock fresh value for their business.

Investors are increasingly seeking sustainability-driven opportunities...

Green finance helps corporates tell their sustainability story...

Favourable rates can be achieved...

For instance, ESG benchmarking agency GRESB says that...

Unlocking Value With Green Finance

We were able to make this [certification from the Climate Bonds Initiative] a critical part of our marketing effort, driving a lot of media coverage — we received an overwhelming response from investors”

Rose Poblete, Controller-Treasurer, San Francisco Bay Area Rapid Transit District

“Internal people who regularly talk to investors don’t understand sustainability quite well enough to talk to the sustainability folks on the investor side at the current time — so it’s really important to have a financial partner who understands the objectives.”

Jonathan Flaherty, Senior Director for Sustainability and Utilities, Tishman Speyer

88% of the finance leaders in our research say their teams lack strong knowledge of green finance

43% of finance leaders say their firm lacks sufficient reporting to monitor the effectiveness of sustainability initiatives

47% of finance leaders will prioritize improving their teams’ knowledge of green financing instruments over the next two years

46% of the finance leaders in our research say their firms need to incorporate more green-related data into their financial statements

84% of respondents plan to issue at least one green bond or loan in the next two years...
