

SWIFTNet @ ING

What?

SWIFTNet is a highly secure global network owned by SWIFT, the Society for Worldwide Interbank Financial Telecommunications. SWIFTNet offers the convenience of one single and truly global channel for all your financial transactions and reporting. SWIFT also maintains the highest possible security standards over one of the largest private networks.

Why?

ING's extensive range of domestic and international services on SWIFTNet, combined with one of Europe's biggest banking networks, ranks ING among the major global banks that are accessible on SWIFTNet.

How?

One multibank channel for all your instructions and reports – globally

SWIFTNet offers one single connectivity solution to manage virtually any bank-account in the world, 24/7, whether you use FIN (SWIFT's message-based protocol) or FileAct (SWIFT's file-based protocol). SWIFT also applies and provides communication standards to exchange financial messages with virtually any financial institution in the world.

ING Services on SWIFTNet (SWIFTNet @ ING)

Whether you want to initiate transactions or download your reporting through FIN or through FileAct, ING gives you access to your accounts in more than 25 countries through one single SWIFT connection.

Extra services via InsideBusiness (portal)

- If you would like to add a level of control, our 'Online authorisation' can give you or your treasurer additional control over your funds
- Track and trace your payments and collections via InsideBusiness or the InsideBusiness app
- Cancel a scheduled order or an individual transaction within an order
- Ad hoc and specific local payments via interactive banking.
